Presenter: Michael Rosen – Senior Investigator, Verizon Investigative Response

Presentation Overview:

Michael has over thirteen years of experience in the information security field, and is currently a senior investigator within Verizon Investigative Response (VzIR). In this role, he is a trusted subject matter expert for digital forensic investigations - most of which involve Fortune 500 global organizations and government entities.

The VzIR team is an integral part of the Verizon Communications Inc. RISK Intelligence team. Within this global team exists digital forensic experts, that are well versed in both criminal/civil investigative requirements. These experts often interact with government entities in transitioning case evidence while setting the stage for prosecution.

Michael will discuss the 2012 Data Breach Investigations Report and lessons learned. This presentation will highlight the significant statistics within the DBIR and what organizations can do to not become one. The 2012 DBIR was a study conducted by the Verizon RISK Team with cooperation from the Australian Federal Police, Dutch National High Tech Crime Unit, Irish Reporting and Information Security Service, Police Central e-Crime Unit, and United States Secret Service
