Speaker Summary:

As the Vice President of Strategic Services at Fishnet Security, Mark Carney leads a group of 22 seasoned security advisors that interface with CSOs, CROs, and CIOs at FORTUNE 500 and global institutions that assist these organizations with information assurance, managed services, identity and access management, and training professional service's needs. Mark has experience in building information assurance professional services organizations, including all aspects of sales/marketing/business development, staff management, project management, and service delivery execution. In his over 10 years at FishNet Security, he has also managed the information assurance division and spent several years as a Sr. Security Consultant.

Presentation Overview:

This is a discussion that will explore information security program maturity models. This session will cover the benefits of these models and how they are leveraged by CISOs. The session will take a closer look into one information security program maturity model and describe its model approach, structure, maturity categories, voting process, and executive dashboard reporting, along with providing a few comparisons of this model with other information security program maturity models available in the market today.

The information presented and included in accompanying materials (if any) is of a general nature and is not intended to address the circumstances of any particular individual or entity. Although the speaker and content authors endeavor to provide accurate and timely information, there can be no guarantee that such information is accurate as of the date it is received or that it will continue to be accurate in the future. No one should act upon such information without appropriate professional advice after a thorough examination of the particular situation.
