Speaker Summaries:

Bryan Wulfig is a Security Sales Executive with Verizon Enterprise Solutions. He has been with Verizon for over a year and half, having spent the first part of his Verizon career on the Cloud and Infrastructure solutions account team. Bryan has over 10 years of experience in the IT industry, crossing many different verticals: Healthcare, Finance, Transportation, Retail and Manufacturing. Prior to Verizon, he worked for a SaaS provider serving some of the largest companies in the world.

In his current role, Bryan provides consulting services in the following areas:

- Governance Risk and Compliance
- Security Policy Assessment & Development
- Global Managed Security Services
- Physical Security & Advisory Services
- Threat and Risk Intelligence
- Vulnerability & Patch Management
- Identity and Access Management
- Security & Network Architecture

Bryan is currently working on various security certifications and has a degree in Management Information Systems from Miami University in Oxford, Ohio.

Leslie Nemitoff is a Sr. Executive Security Consultant with Verizon. She was previously with Vigilix, TruSecure, and Cybertrust, prior to its acquisition by Verizon in a Security role. She served with the Gartner Group for eight years earlier in her career.

In her current role, Leslie provides consulting services in the following areas:

- Governance Risk and Compliance
- Security Policy Assessment & Development
- Global Managed Security Services
- Physical Security & Advisory Services
- Threat and Risk Intelligence
- Vulnerability & Patch Management
- Identity and Access Management
- Security & Network Architecture

Leslie is a past board member of the Kansas City ISSA Chapter. Leslie holds a Bachelor of Science from Rutgers University and is currently studying for her CISSP.

DeWayne Sprou is a Sr. Security Sales Engineer with Verizon Terremark. DeWayne has 30 years with Verizon Terremark in various roles to include Operations, Technical Service Management, Network Design, and Security Sales Engineering. In his current role, DeWayne provides technical expertise and consulting to all aspects of Verizon Security Solutions including design, strategy, planning, and training to customers and internal teams.

A firm believer in the security community, DeWayne Supports community efforts in membership with ISSA, ISACA, and a member for the Kansas City chapter FBI/Infragard. DeWayne also serves as a board member for the Kansas City Chapter FBI/Infragard.

In February 2012, DeWayne was nominated by the Department of Homeland Security and then served as a primary stakeholder representing the private sector in the drafting of the FEMA Presidential Policy Directive #8 National Preparedness Mitigation Framework.

DeWayne is a Certified Information Systems Security Professional (CISSP), and holds the Bachelor of Science in Organizational Security and Management from the University of Phoenix.

Presentation Overview:

For years enterprises have turned to the Verizon Data Breach Investigations Report (DBIR) to learn about the ever-changing threats facing their organization.

This year, we've pioneered a new way of looking at threat data, classifying more than 90% of recent incidents into just nine patterns.

It makes the huge complexity of the cybersecurity space clearer to understand, so you can prioritize your response to the attackers and methods that pose a real risk to you.

Verizon will give you the inside track on the headline findings of the 2014 DBIR, and explain what our new pattern-based approach means to you.
