Presentation Overview/Speaker Bio:

With one eye toward prevention and the other eye toward easy-to-remember best practices in case of an incident, this presentation uses startling real world scenarios and statistics to train attendees to respond to workplace violence with a life-saving approach.

Jeffrey Cheek, a former police officer, has become widely known for his expertise in security, safety and emergency management. Educated in criminal justice, corporate/personal security, and human resources, Jeff consults with businesses and professional organizations to manage risk by implementing active shooter prevention and response strategies, helping to ensure a safer workplace.

Recognized recently by NBC's *Dateline* for his investigative work on two cold cases, as well as by Kansas City-area media for his active shooter training expertise, Jeff calls on the skills and tactics he honed as an officer, security consultant, and defense teacher to bring confidence and peace of mind to companies and their employees before a crisis occurs.
