**Presentation Overview:**

IT ecosystems continue to quickly evolve. Companies are facing new threats to secure and maintain their data as they address mobile computing, cloud computing, big data and social media. This presentation provides an overview of the risks and trends facing companies and provides thoughts on how Information Security, Privacy, and Internal Audit departments can help manage and protect a company's sensitive data.

Topics to be discussed during the presentation include:

- ◆ Privacy and Information Security Overview
- ◆ Understanding Risks and Exposures
- ◆ Trends/Hot Topics in Data Privacy & Information Security
- ◆ Internal Audit's Role

**Speakers:**

**Anthony Canning, Director, Pricewaterhousecoopers**  
**Tim Gruninger, Director, Pricewaterhousecoopers**  
**Jason Stauffenecker, Director, Pricewaterhousecoopers**

Please refer to page 2 for more information on this month's speakers.

The information presented and included in accompanying materials (if any) is of a general nature and is not intended to address the circumstances of any particular individual or entity. Although the speaker and content authors endeavor to provide accurate and timely information, there can be no guarantee that such information is accurate as of the date it is received or that it will continue to be accurate in the future. No one should act upon such information without appropriate professional advice after a thorough examination of the particular situation.

## January Meeting Speaker Information

### **Anthony Canning, Director, Pricewaterhousecoopers (Kansas City)**

Anthony Canning has over 12 years of experience and has extensively led and performed controls reviews, attestations and internal audits. He has assisted clients in preparing for a wide array of regulatory needs and requirements and has helped his clients address new regulatory matters. In addition to performing controls assessments, Anthony assists clients with enhancing their governance, risk management, and compliance activities through the design and integration of IT, security, financial, and operational controls. Anthony is a Certified Information Systems Auditor (CISA) and is a member of the Information Systems Audit and Control Association (ISACA) and the Institute of Internal Auditors (IIA).

### **Tim Gruninger, Director, Pricewaterhousecoopers (St. Louis)**

Tim Gruninger has over 10 years of experience performing IT audits and has extensive experience with process improvement, assurance and compliance work over technology, financial, regulatory and operational areas. As a Data Protection & Privacy Directors, Tim assists clients in assessing the maturity and effectiveness of their overall data privacy programs. His project experience includes leading service delivery for a portfolio of SOC 1s, internal audit, external audit, and Business Advisory Services projects. Tim is a Certified Information Systems Auditor (CISA) and is a member of the Information Systems Audit and Control Association (ISACA) and the Institute of Internal Auditors (IIA).

### **Jason Stauffenecker, Director, Pricewaterhousecoopers (Minneapolis)**

Jason Stauffenecker has over 13 years of professional services experience focusing on IT and Information Security orientated audit and consulting services for numerous companies in a wide variety of industries. During his time at PwC, Jason has designed and executed numerous technical, security, operational, and compliance assessments and audits. In addition, Jason has extensive experience in development and implementation of information security and risk management strategies, developing, maintaining, and assessing overall Privacy and Data Protection programs. Prior to his role in IT Security, Jason provided a variety of internal audit and risk consulting services, including Sarbanes-Oxley Section 404 compliance, IT controls design and effectiveness reviews and has lead internal audit co-sourcing engagements.

**W e l c o m e** to our newest members!

We're growing! The Chapter would like to welcome the following members that joined us in November and December. If you see them at an upcoming Chapter event, please introduce yourself and give them a warm welcome!

## News from ISACA

### Win a FREE Trip to An ISACA Conference

ISACA has launched a new recognition program in 2014 to reward topic leaders for their active participation in the Knowledge Center. The three topic leaders with the highest activity rating (based on discussions and replies) will be recognized in *@ISACA* and on the ISACA web site on a quarterly basis. At the end of the year, the topic leader with the highest participation rate will win a trip to the next ISACA conference in their region. There are immediate needs for topic leaders on the following Knowledge Center topics:

- Business Continuity/Disaster Recovery
- Cybersecurity
- Information Security Management
- Information Security Policies and Procedures
- PCI DSS
- Privacy/Data Protection
- COBIT 4.1 or COBIT 5

Interested? Visit the [Become a Topic Leader](#) page of the ISACA web site for and browse all Knowledge Center topics to match your area of expertise. Once you're a Topic Leader, you'll also need to opt in to the contest.

### Become An Item Writer!

ISACA certification programs are successful because they're based on the expertise of the community. So if you're looking for a new way to give back to the profession or earn CPEs, consider writing items for one of the exams and review materials. Each accepted submission is worth \$50. For information on how to apply or the exam items that are needed, [click here](#).

### Advanced Persistent Guidance Available for Free Download

Advanced Persistent Threats, or APTs, can easily evade conventional security controls like antimalware. ISACA has just released an eBook that explains APTs, provides helpful advice on how to assess the risk of an APT to an organization, and recommends practical measures that can be taken to prevent, detect and respond to such an attack. Written in non-technical language, it is designed for security managers, auditors, or executives responsible for protecting intellectual assets or critical services. Members can [download the eBook](#) for free; non-members can purchase it for \$60.

### Senior IT Security Analyst, Capitol Federal Savings

The Senior IT Security Analyst is responsible for assessing information risk and facilitates remediation of identified vulnerabilities for IT security and IT risk across the enterprise. [View the full job description](#) or [apply online](#). Updated 12/10/2013.
