July Meeting Details

Bring Your Own Device To Work—Key Steps for An Effective Program

Date: July 12th, 2012
Time: Registration 11:30 AM | Lunch 12:00 PM| Presentation 1:00—3:00 PM
Location: Figlio Tower | 209 West 46th Terrace | Kansas City | Missouri
CPE: 2 Credits. NOTE: *The actual CPE hours granted are dependent upon duration of the speaker's presentation and may differ from the advertised number of CPE hours.*
Price: $35 members | $50 guests | $5 students
Registration: www.isaca-kc.org by Monday, July 9.

Presentation Overview:
Organizations are challenged by the explosion in the use of personal mobile devices on company networks - commonly referred to as "Bring Your Own Device" (BYOD) or "Consumerization of IT". In this session, we will discuss the following considerations:

- Background on the BYOD Trend
- The challenge to information security
- Strategic and operational business impacts
- What organizations and vendors are doing to balance productivity and security
- Key steps for implementing an effective BYOD program

Information on these and other topics will provide practical and valuable guidance to anyone with responsibility for implementing, improving, assessing, or overseeing BYOD programs from the audit\security department to the executive suite.

Speakers:
John Hollyoak is a Senior Manager at Protiviti, Chicago, IL. John provides security and privacy solutions to Fortune 1000 clients in the financial services, pharmaceutical, manufacturing, energy, healthcare, and consumer goods industries. Most recently, John has been helping clients devise strategy and implement solutions for managing the risks associated with mobile, virtualization, cloud, and social media.

Gordon Braun is a Director at Protiviti where he leads the Kansas City office. For the last 13 years, Gordon has been providing internal audit and risk consulting services across several industries. He is an active leader of Protiviti's Central Area Internal Audit practice and has a particular focus on assisting clients with the assessment and management of business risks associated with the deployment and maintenance of technology.

Upcoming Events

INTERFACE 2012 comes to Kansas City

Date: July 25th, 2012
Time: 9:00 a.m.—4:30 p.m.
Location: Ritz Charles | 9000 West 137th Street | Overland Park | Kansas
CPEs: Up to 6, depending on sessions attended. Not open to students. Must be 18 or older to attend.
Price: FREE for ISACA members that register via this link:
http://www.f2fevents.com/event-registration.html?eventid=12&event=Kansas City, Missouri&association=ISACA - Kansas City Chapter

INTERFACE 2012 is a single-day IT conference that addresses the advances in information security, business continuity planning, and communications through non-sales oriented educational presentations, vendor exhibits, and thought-provoking keynotes.   Attendees are middle and senior-level IT managers from corporate, academic and government organizations who are intent on advancing their enterprise and departmental objectives by being educated on current technology and future trends presented by industry experts as well as active dialogue with leading solution providers.

InfoSec Institute\Intense School Offers Discounts to Members

InfoSec Institute, a national provider of information technology and information security professional development courses, is currently offering 20% off their bootcamps and classes to the ISACA community. Stay sharp with training on Microsoft and Cisco products, Project Management Professional (PMP), Ethical Hacking, Computer Forensics, CISA, CISM and many others. You must provide proof of membership to your enrollment specialist to receive the 20% discount.

Also, check out their free information security training, tutorials, videos and other free learning resources at http://resources.infosecinstitute.com.

Welcome to the Kansas City Chapter of ISACA!!

Naeem Babri	Mathew Caughron	David Mauer
Wojciech Borysiewicz	Tim Gadd	Craig Rickel

Get Involved: Write an Article for the Newsletter!

We are always looking to add new and interesting content to the newsletter and are accepting article submissions from our members for consideration. To be considered for publication, articles must meet the following criteria:
- Word or text document format with 500 words or less
- Relevant to ISACA, IT Governance, IT Audit, Information Security, etc.
- References to all applicable sources, including the title, author, and date written.

To submit or for more information, please email newsletter@isaca-kc.org.

News from ISACA

ISACA Issues Guidance on Virtualized Desktop Infrastructure (VDI)

Rolling Meadows, IL, USA (22 May 2012)—Today's mobile users are demanding to access data from anywhere at any time. According to an annual ISACA survey on BYOD security, the use of mobile applications has nearly tripled since 2011, and two-thirds of employees aged 18 to 34 use a personal device for work purposes.   While the productivity benefits are obvious, the likelihood of a security breach if a device is lost or stolen is also dramatically increased.

Virtual desktop infrastructure (VDI) allows users to access applications and data securely from remote locations with minimal risk of data loss, while simplifying desktop management within the traditional boundaries of the enterprise. With VDI, data is stored on a centralized server rather than the device itself.

To help enterprises realize the benefits of VDI adoption and understand the security concerns associated with it, global nonprofit IT association ISACA has issued a white paper titled Virtualized Desktop Infrastructure (VDI), available as a free download at www.isaca.org/vdi. The paper spells out how to develop strategies to mitigate VDI threats and names enablers that can help with its adoption.

CISM, CRISC Among Highest-Paying IT Certifications

ISACA's Certified Information Security Manager (CISM) and Certified in Risk and Information Systems Control (CRISC) credentials were named two of the highest-paying IT certifications in the latest Foote Partners' *IT Skills and Certifications Pay Index*™ (ITSCPI). The recognition shows that employers are investing in professionals with specific IT skill sets that demonstrate the knowledge and expertise to address current and emerging challenges such as cloud computing and big data.

The CISM credential has become recognized worldwide as a symbol of excellence in information security, and has been earned by nearly 20,000 professionals since its introduction in 2002. This certification affirms to employers that the candidate they are hiring is equipped with strong security management skills and has demonstrated experience in security management.

CRISC is highly desired because it is the only certification that positions IT professionals for future career growth by linking IT risk management to enterprise risk management. Over 16,000 professionals in IT, security, audit and compliance have earned the CRISC designation since it was established in April 2010.

If you are interested in learning more about either of these certifications, visit the ISACA certification page at http://www.isaca.org/CERTIFICATION/Pages/.

Registration Now Open for December Certification Exams

Interested in getting certified but missed this month's exam? Exams are held twice a year and registration is now open for the next exam date on December 8th. Save $50 by registering by August 15th!
