Registration: www.isaca-kc.org by Monday, September 9th.

Presentation Overview:

Join us for our September meeting where we will dive into the topic of Business Continuity. Our speakers will share information on the evolution of business continuity, discuss the components of an effective continuity program, share industry insights and leading practices for building a governance framework and risk management program, and discuss how companies are addressing some of the emerging trends and challenges.

Speakers: Bryan McGowan, KPMG and Reggie Hair, Sprint Corporation

Bryan McGowan is a Director in KPMG's Advisory practice. Over the last 10 years, Bryan has consulted with a number of companies on business continuity (BC) and disaster recovery (DR). Specifically, Bryan has designed business continuity governance frameworks, testing strategies, conducted business impact analyses, and developed business continuity, disaster recovery, and crisis management plans. Prior to joining KPMG, Bryan worked in the Technology Planning organization at SBC Services (now part of AT&T) and assisted in the development, testing, and roll out of the enterprise IT disaster recovery plan.

Reggie Hair is the Manager of the Business Continuity Office at Sprint Corporation. He has 10 years' experience as a leader of the enterprise Business Continuity program and leader of the enterprise incident management structure. Reggie leads a team that is responsible for facilitating enterprise process change, training and exercising cross-functional teams and executives and establishing direction, goal and objectives for the company BC program.

News from ISACA

ISACA Credentials Listed Among Highest-Paying IT Certifications

ISACA's CISA, CISM, CGEIT and CRISC credentials have been named among the highest-paying certifications in the latest Foote Partner's "IT Skills and Certifications Pay Index". The Index tracks pay premiums earned by over 47,000 IT professionals with 629 individual certified and non-certified IT skills at close to 2,500 employers in North America.

Member-Get-A-Member: Get Rewarded!

Do you have friends, colleagues, or co-workers that you think would benefit from being a fellow ISACA member or certified professional? ISACA's "Member Get A Member" program is a win-win program: the people you recruit as new members will benefit from all the education, idea-sharing and professional development opportunities that you already enjoy as a member. And you'll get rewarded for every new member you recruit:

- For every new member, you'll receive one entry into a monthly drawing for a new Apple iPad mini.
- Recruit 5 to 9 new members and receive a new Apple iPod touch
- Recruit 10 or more new members and receive a new Apple iPad 2

ISACA has made it easy to reach out to potential members by providing a sample email that you can use. To be credited, the new member just needs to include your member ID number on their application.

For more details on the program, visit http://www.isaca.org/membership/member-get-a-member.

New Research: Privacy and Big Data

The World Economic Forum describes the personal information that makes up big data as "the new oil" - a valuable resource of the 21st century. Risk management and security controls often are not at the forefront of a big data initiative as CIOs rush to reap the benefits of big data and its vast potential. But organizations are starting to realize their role in protecting the privacy of personal data in that vast sea of information.

ISACA has issued new "Privacy and Big Data" guidance that includes 16 important questions which, if ignored, would expose an enterprise to greater risk and damage. Find out what those questions are at www.isaca.org/privacy-and-big-data.
